

## Project Idea

“NestUp BD” is a web platform that helps Bangladeshi people manage short-term relocation during exams by offering verified housing, transport, food, and exam essentials.

It streamlines all key services into one portal, reducing stress, struggle and saving time for students on the move.

## Service Provider:

- Posts and manages service gigs (housing, transport, food, stationery).
- Receives and responds to booking requests from users.
- Builds reputation through reviews and verification badges.
- Handles payments externally (e.g., bKash, Nagad).

## Service Receiver:

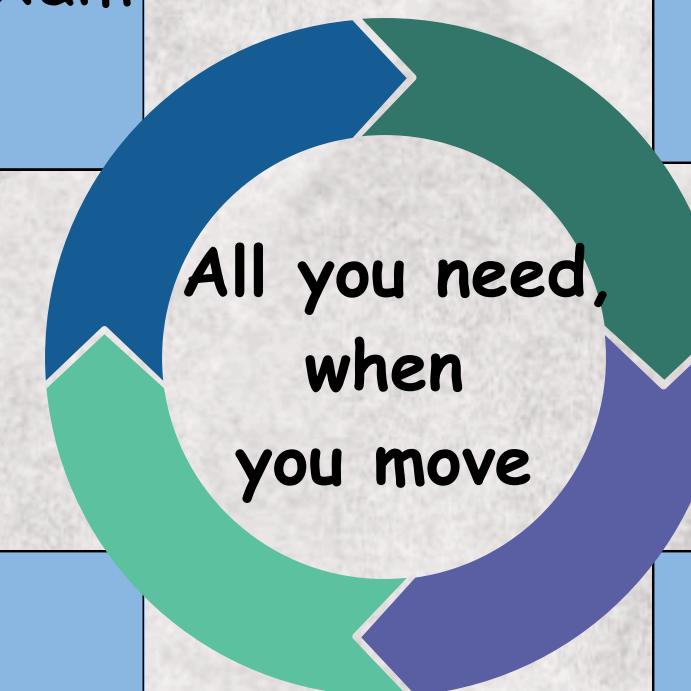

- Searches and books verified services easily.
- Uses filters to find housing, transport, food, or supplies.
- Views booking history and leaves service reviews.
- Accesses trusted local providers, saving time and effort.

## House Finder

- Search short-/long-term student housing
- Filter by price, distance, gender, Wi-Fi
- Landlord verification badge
- Book with advance payment (bKash/Nagad)
- Room-sharing options for co-exam students

## Transport Booking

- Book nearby rides to/from exam centers (rickshaw, CNG, bike,etc.)
- Distance-based price calculator
- Schedule advance pickups
- Emergency ride request

## Local Food & Water Delivery

- Affordable meals from verified vendors
- Dietary filters: halal, veg, etc.
- Bulk water delivery
- Hygiene-rated vendors
- Service and meal reviews

## Stationery & Exam Supplies

- Order pens, boards, calculators, etc.
- Quick delivery for urgent needs
- Pre-made stationery bundles
- Verified, fair pricing

## PURPOSE

People going to another city for admission exam, Job exam, etc.. other events

While individual services-apps exist, none offer the comprehensive, integrated solution

It's not like the vehicles, cook, delivery-man,etc are from our company.  
It's local general people

Gig Based business model, user can post(provide) their service or get service

Frontend: React.js

Backend: Node.js + Express

Database: MySQL
